With his first progeny weaned, Affinity is off to the races. Breeders report the calving ease and good nature of his calves. His feminine, broody heifers have superior udder attachments stemming from five generations of strong udders in the Athena cow family. The group of Affinity heifers weaned at Lindskov-Thiel Ranch this fall averaged 102 for weaning ratios. Affinity's sons are made to be sale features and problem-free breeding bulls. In the L-T herd they averaged 80 lbs. at birth and 780 lbs. at weaning. Set your sight for the finish line with LT Affinity.
